

WE ARE BACK

WELCOME TO THE LINUX INSTALLFEST

This is reality.
....
We're ready, but where is the fun?
Welcome to the Installfest!
Empty

WHAT IS LINUX ?

A generic name for the unix-like Operating Systems based on the linux kernel .

Open - Source : source code is accessible to everyone. Developers can examine, modify, and contribute to the operating system itself, which promotes transparency and collaboration.

LINUX - Recipe

DISTRIBUTIONS - Dishes

DISTRIBUTIONS ?

- Linux is not a single operating system but a family of many different versions (called distributions or "distros") that serve different purposes.
- They are built by taking the core Linux kernel and combining it with various user interfaces to create a complete and functional operating system.
- Each distribution can have its own unique features, design principles, default software, and target audience.

DISTRIBUTIONS ?

Ubuntu

Because penguins deserve a user-friendly vacation spot too!

Fedora

Where your computer wears a stylish hat and runs like a champion.

Kali

Hacking problems, not friendships.

I USE ARCH btw....

YOU LIKE MINT ?

Lets give one to your pc too

=

It is designed to work 'out of the box' and comes fully equipped with the apps most people need.

Yes you can play a bunch of games too

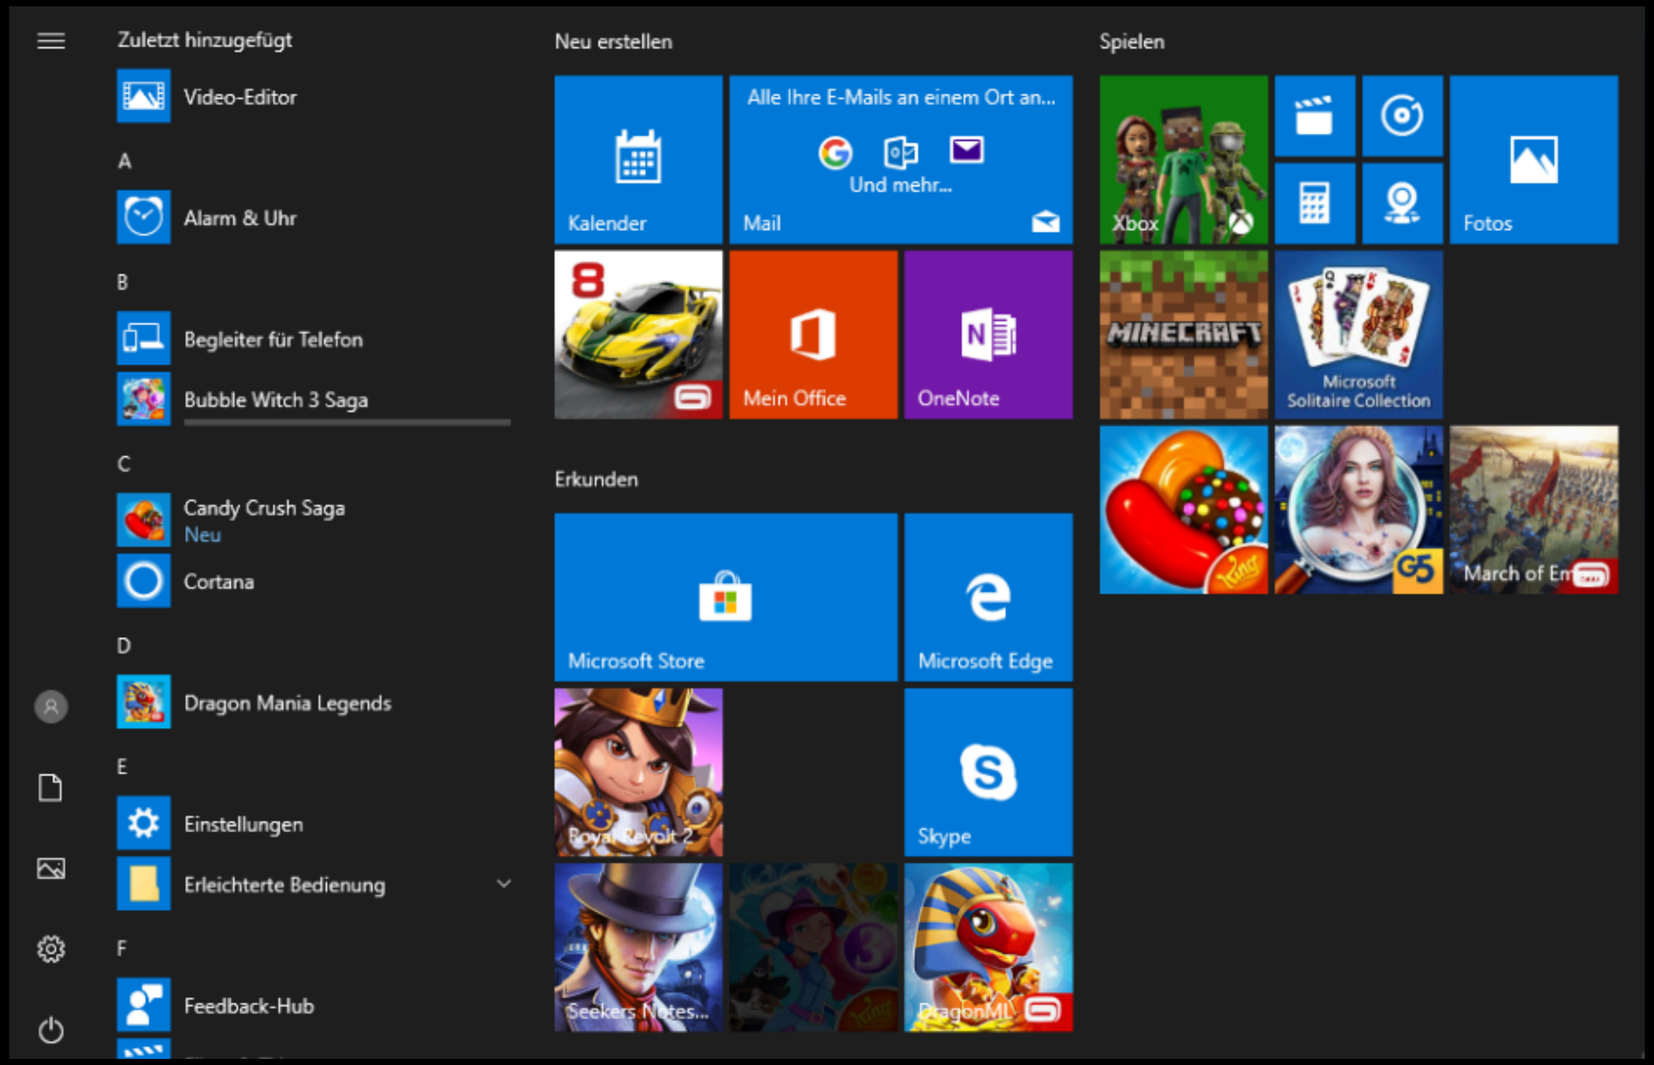

I USE ARCH btw....

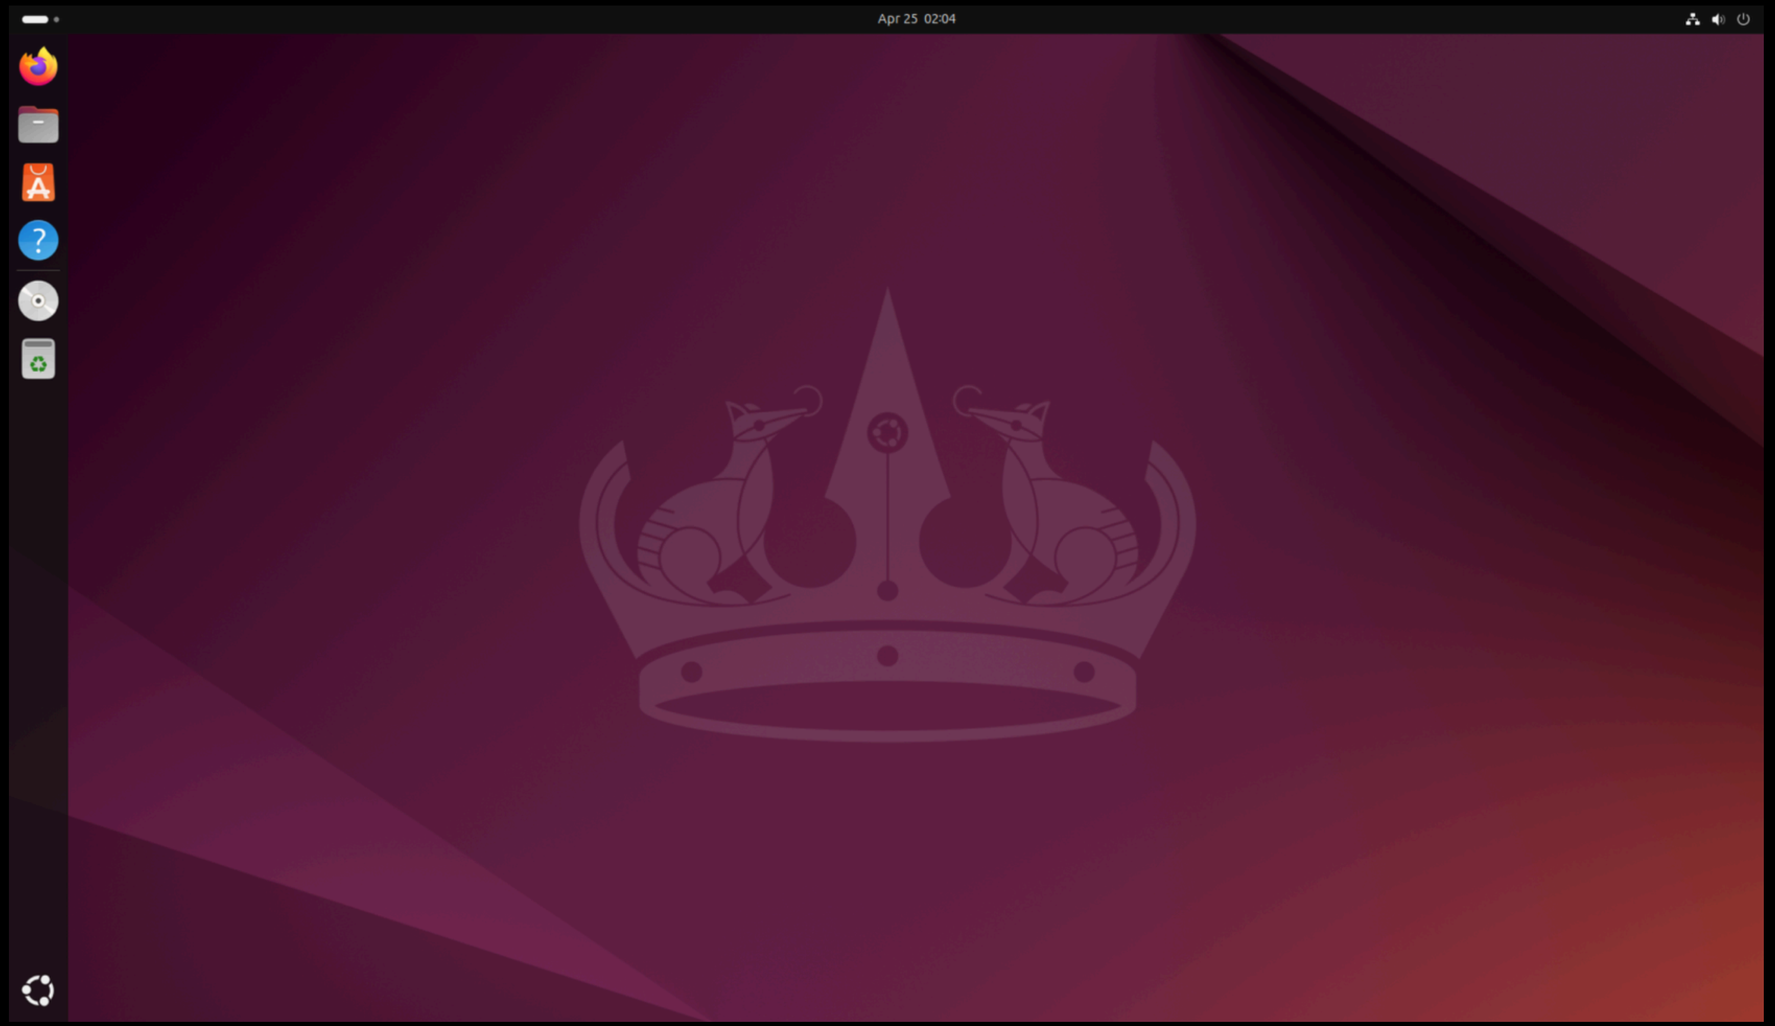

WHY LINUX ?

1. Free and Customizable
2. Ultimate Power of the Terminal
3. Learning Curve (How OS actually works ?)
4. Native Support for the developers
5. Usage - servers, cloud environments, and even in mobile devices (through Android).
6. Security
7. Lightweight
8. ITS SUPERCOOL

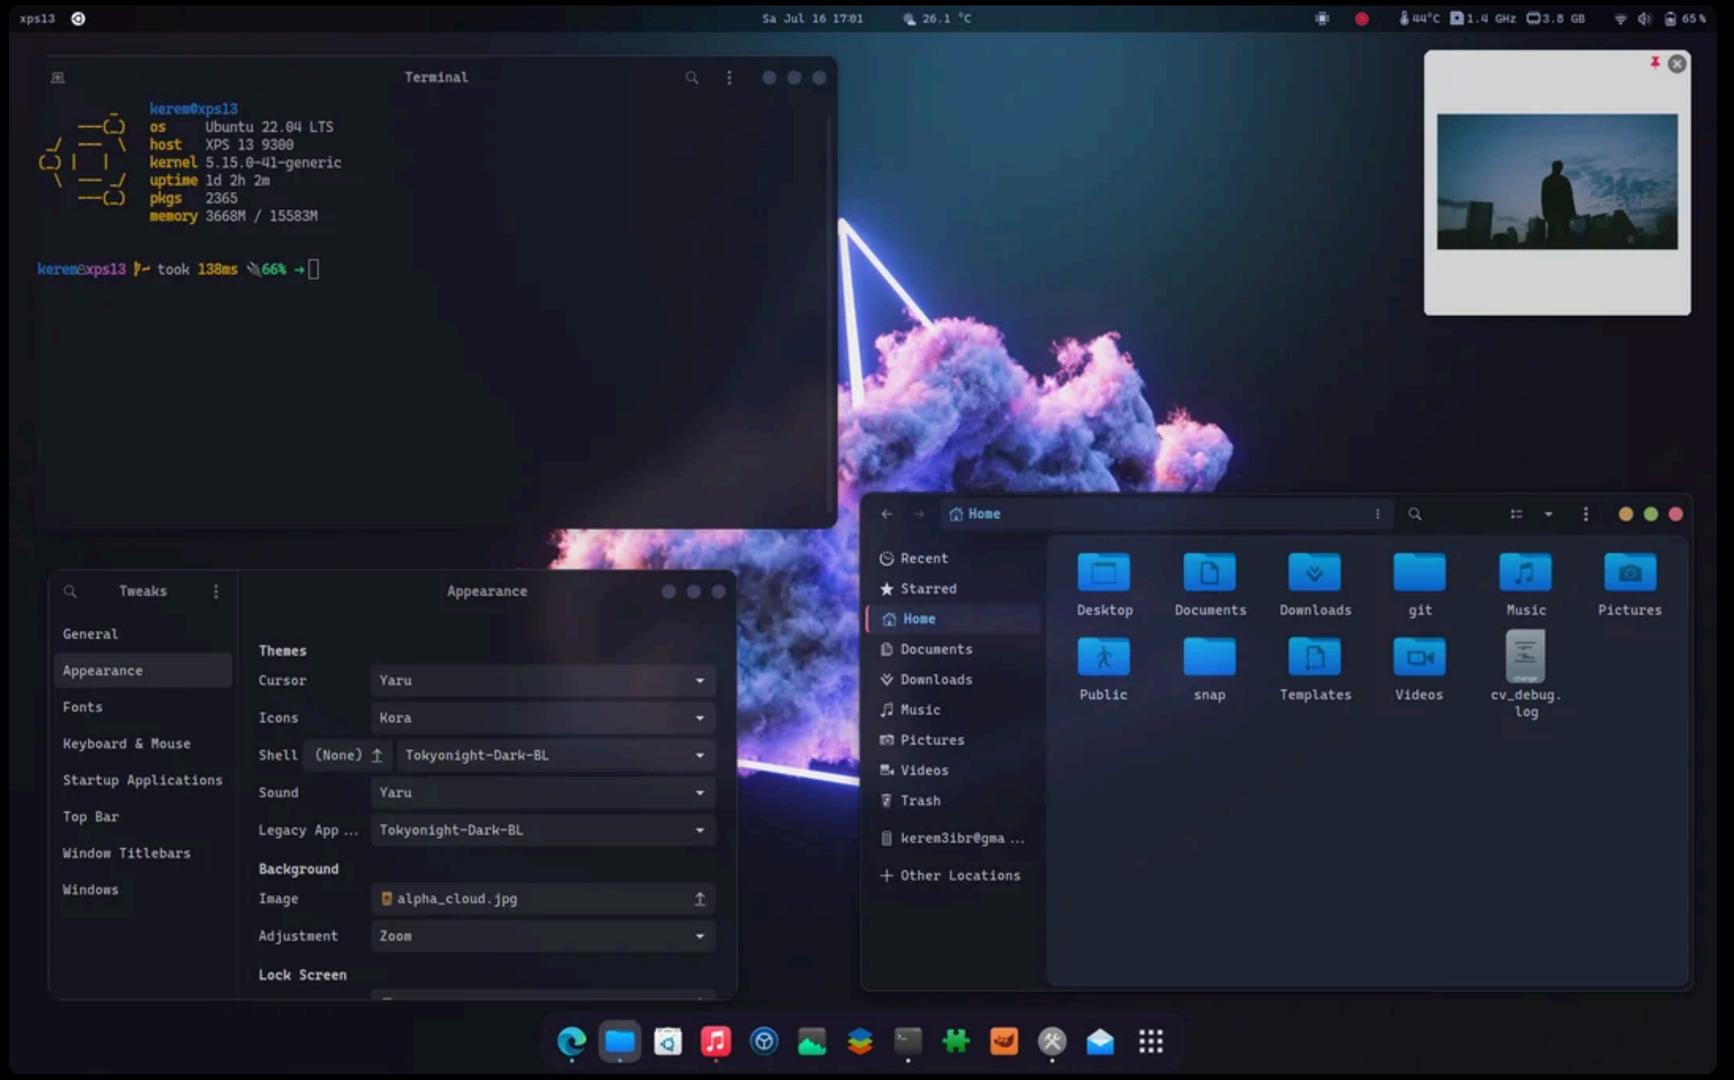

EWW BLOATWARE

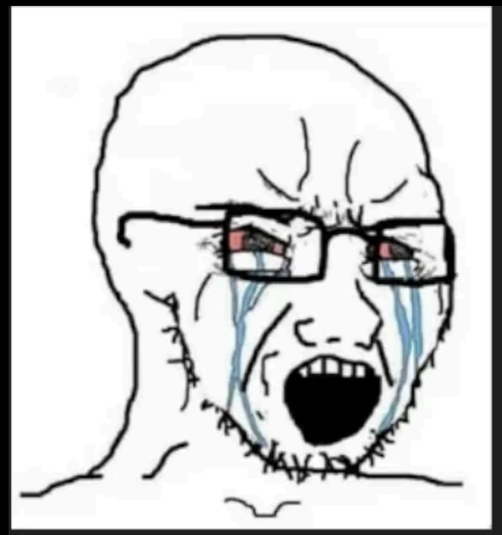

CLEAN AF

gui

> you need separate app for every task

> requires good hardware

> usually not well documented

> requires mouse

> noobs uses it

cli

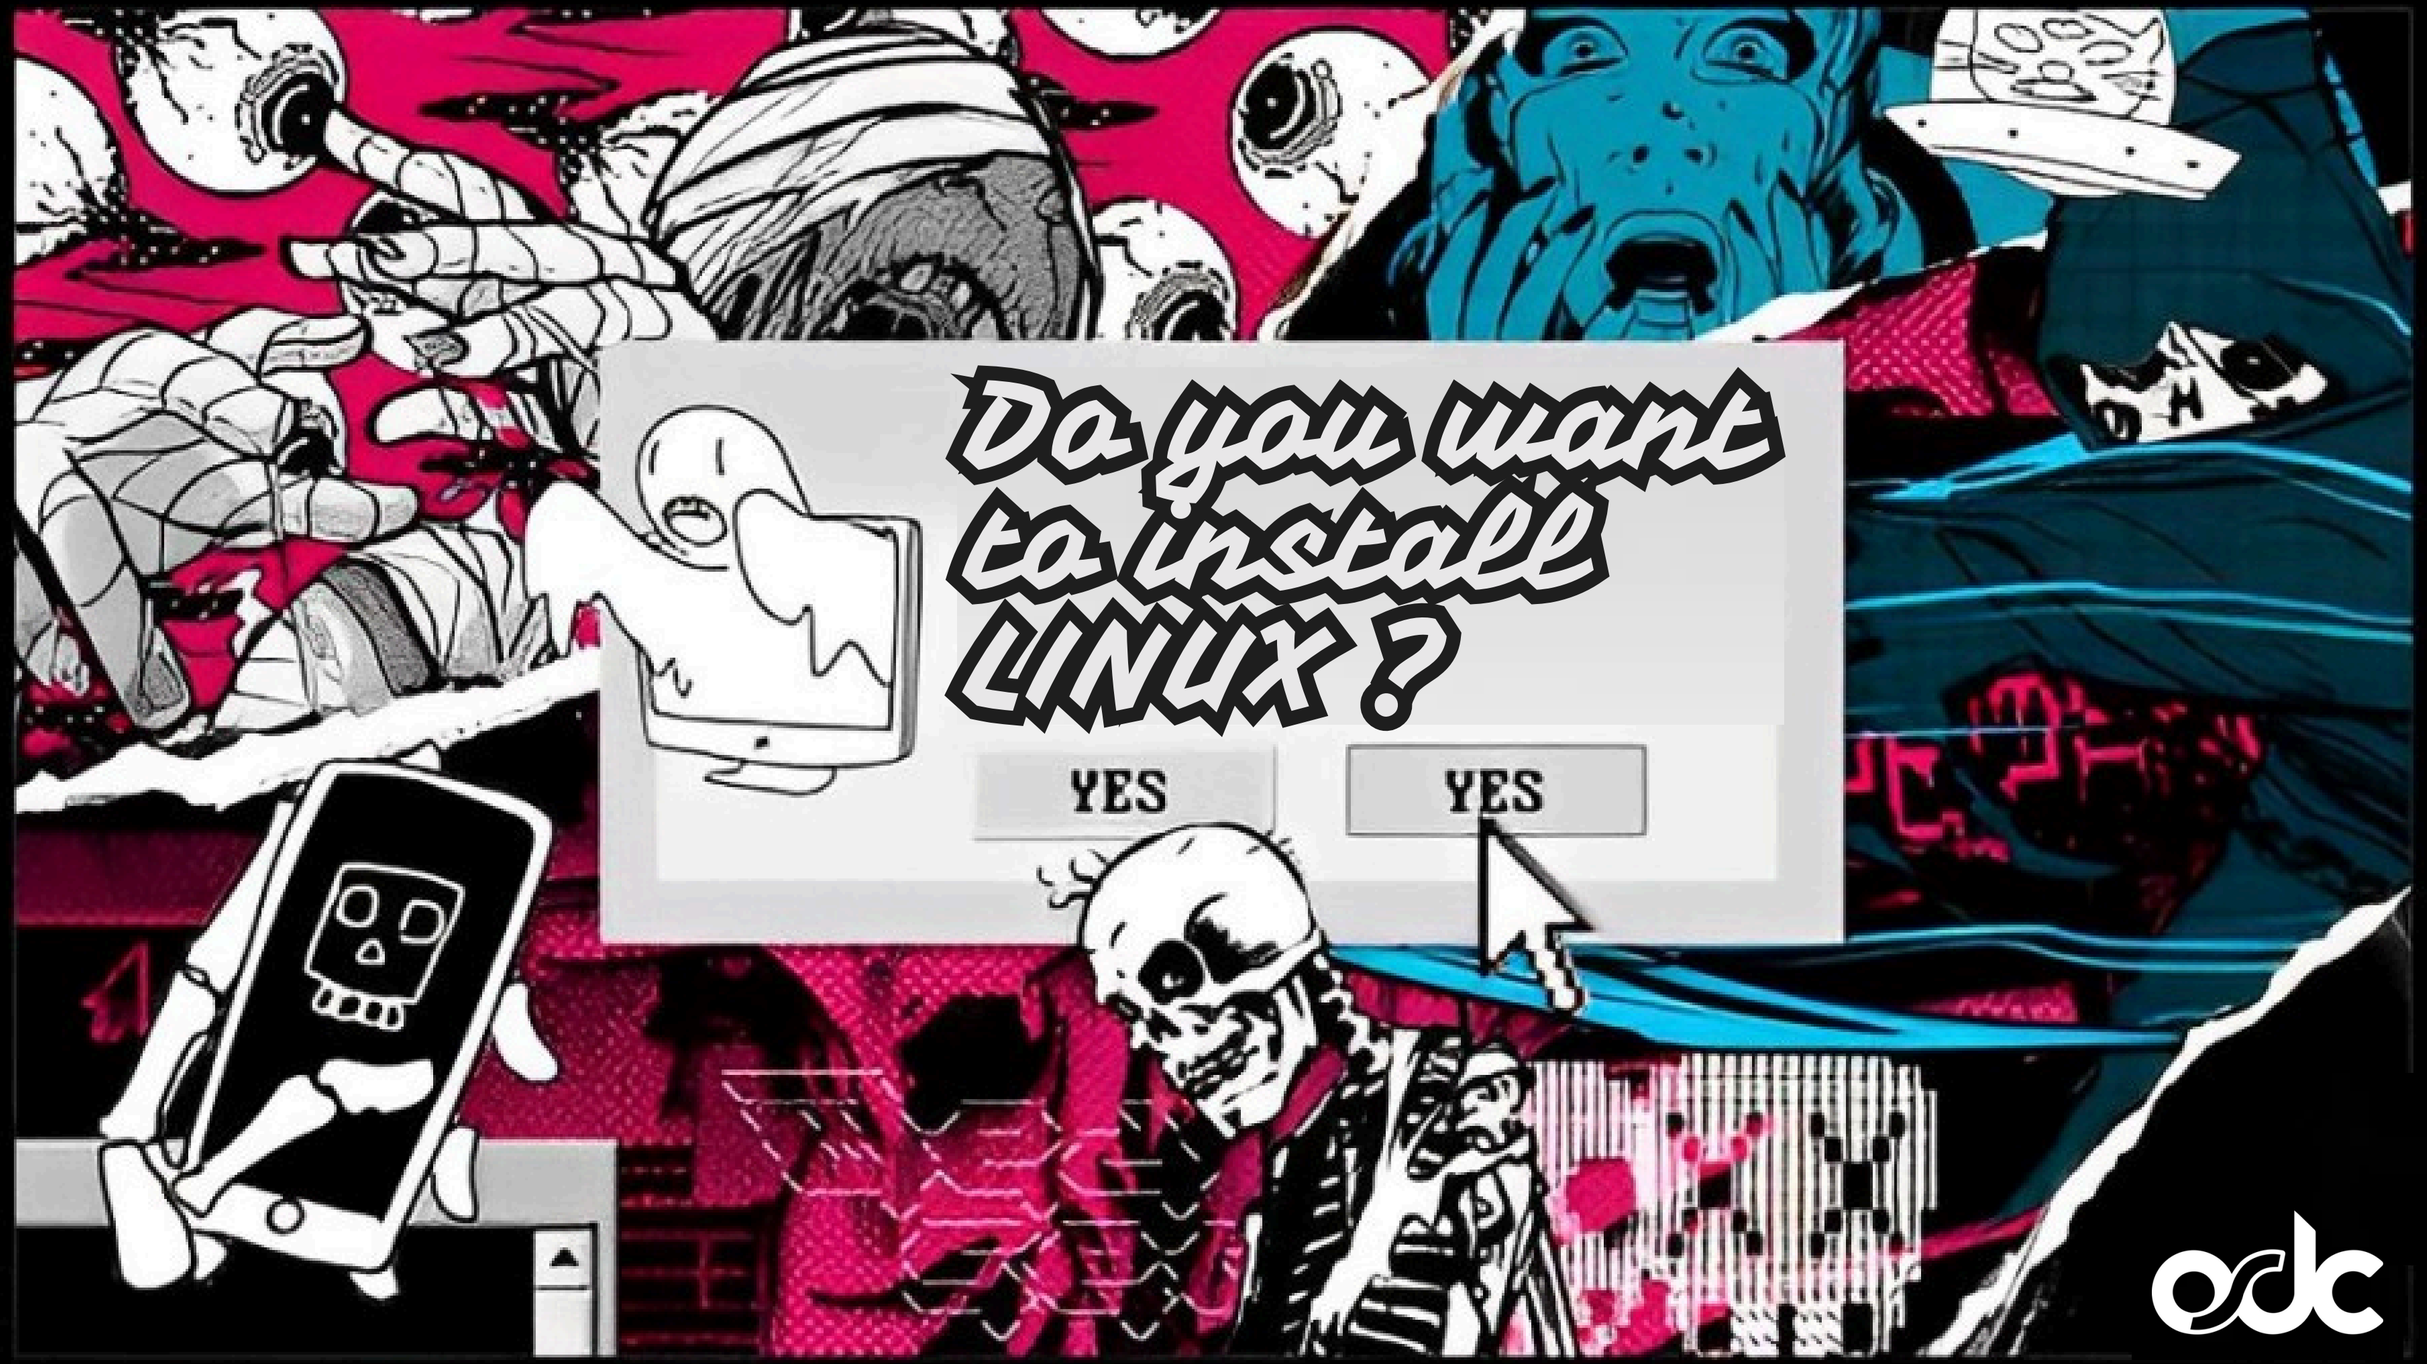

> terminal emulator

> can run on toaster

> RTFM

> keyboard only

>noobs are too silly to rtfm

Do you want to install LINUX ?
YES
YES

ATTACK
OF THE
WARNING !
DO NOT OVERWRITE
YOUR WINDOWS!
OK

VM:

HARDWARE VIRTUALIZATION: THE VM EMULATES HARDWARE COMPONENTS, SUCH AS CPU, MEMORY, AND STORAGE, TO CREATE A VIRTUAL ENVIRONMENT.

GUEST OS: THE VM RUNS A GUEST OS, WHICH IS A SEPARATE OS FROM THE HOST OS.

🐌 YES THIS IS AS SLOW AS SNAIL

REAL MACHINE:

NATIVE EXECUTION: LINUX RUNS DIRECTLY ON THE HARDWARE, WITHOUT ANY EMULATION OR VIRTUALIZATION LAYER.

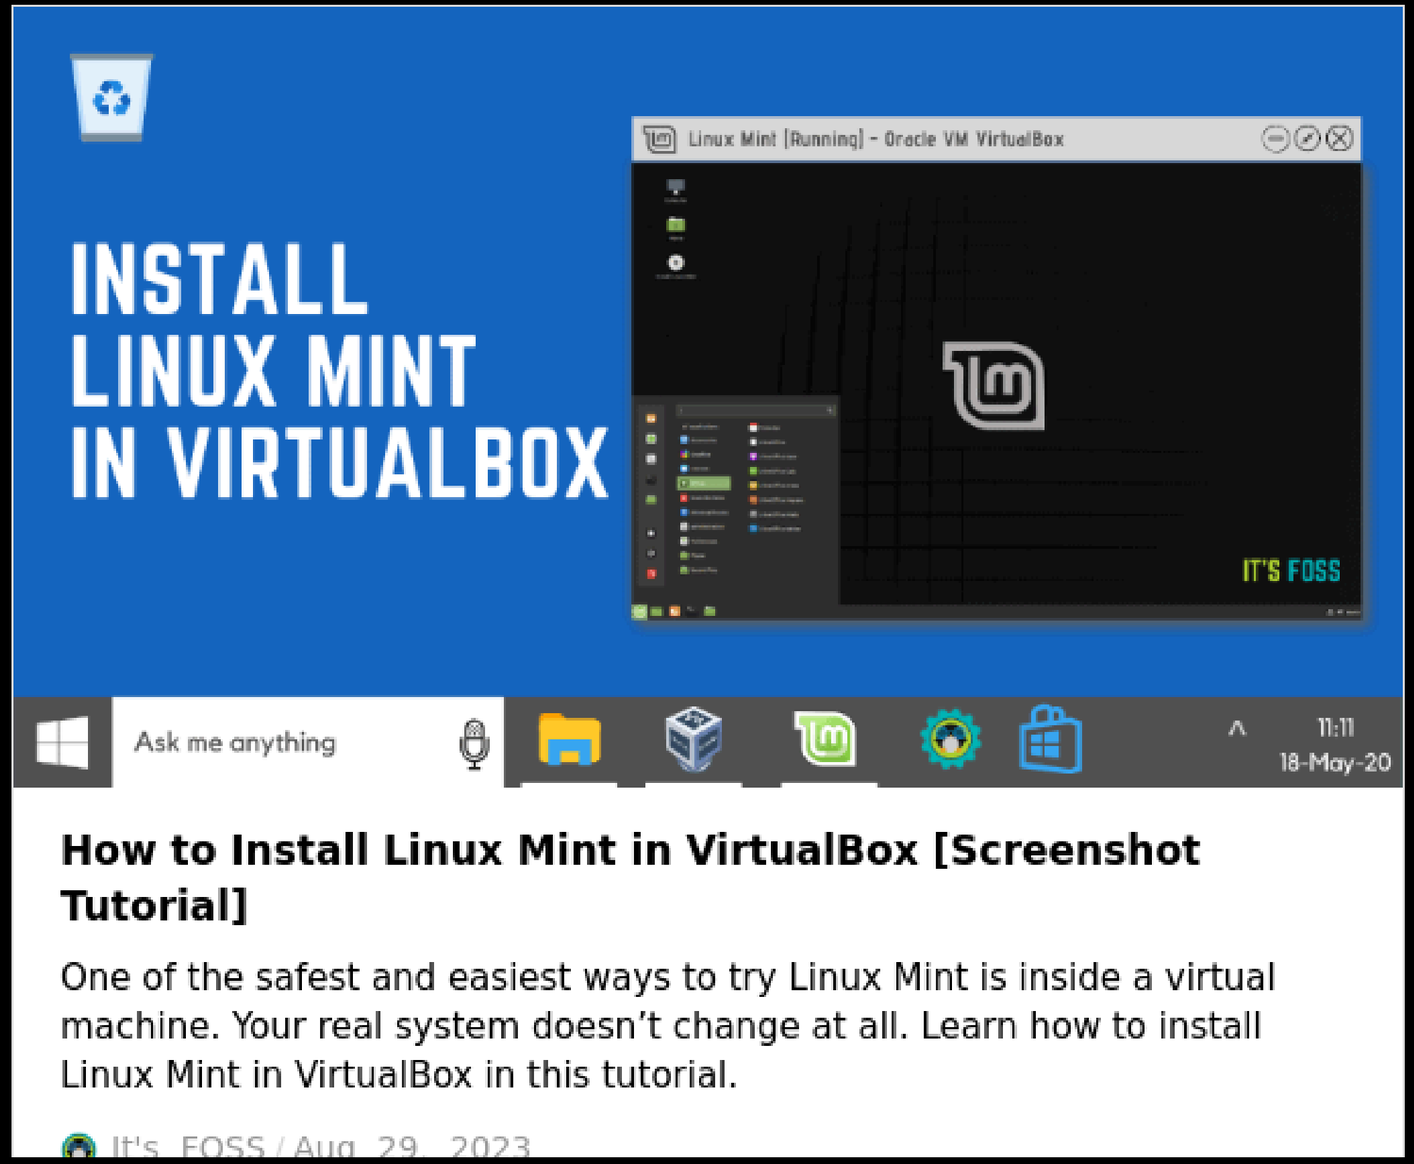

DIRECT HARDWARE ACCESS: LINUX HAS DIRECT ACCESS TO THE HARDWARE COMPONENTS, SUCH AS CPU, MEMORY, AND STORAGE.

🐇WE'RE COMPARING HIM WITH SNAIL NOT A WITTY TORTOISE

LET'S BEGIN

FOLLOW THIS TUTORIAL FOR THE EXACT STEPS

we’re here to assist

https://itsfoss.com/install-linux-mint-in-virtualbox/
